Mirror An Existing Volume

Volumes Summary							
Volumes							
	Name	State	Condition	Redundancy	Storage Pool	Storage Domain	Raw Capacity
☒	alex-test	Free	Intact	None			24 MB
☒	defit-vol0	Free	Intact	None			16 MB
☒	defit-vol1	Free	Intact	None			24 MB
☒	myvol	Free	Intact	Mirrored			8 GB

VolumesSummary > VolumeDetails
defit-vol0 - Volume Details

Configuration Services

Mirror Volume

Steps: 1. Specify Mirror Properties

Indicate which has a higher priority: I/O to the volume, or resilvering between the mirror components.

Resilver: ☐ Give resilvering priority over volume I/O
Priority: ☐ Give volume I/O priority over resilvering

Select mirror component creation strategy.

1st mirror component is volume **defit-vol0**
Create 2nd component from a
Create 3rd component from a
Create 4th component from a

Previous Next

Optional Step. Only shown if none of the selected mirror components have snapshot space.

Configuration Services

Mirror Volume

Steps: 1. Step: Allocate Snapshot Reserve Space

A volume may have up to 8 active snapshots. These are stored in a Snapshot Reserve space which may be allocated from any Storage Pool in the same Storage Domain as the volume. Space for more than 8 snapshots may be allocated as a deleted snapshot's space in the reserved area is not available for subsequent use until all older snapshots are also deleted.

Allocate Space For:

Expected Write Activity:

Allocate Reserve from Storage Pool:

Volume / Snapshot Policy:

Associate with Mirror Component:

Previous Finish Cancel

*Two, 2MB, Mirror Logs will also be created from the selected storage pools. BV will automatically put them on separate arrays. (VLV -> VLV corner case)

Error

Cannot create the mirrored volume. Possible reasons are:

1. Not enough capacity in selected storage pools. Add storage to selected pools or select different storage pools. Also, try changing capacity related mirror properties, such as:
 - a) Number of Components, reduce the number of components in the mirror.
 - b) Reserve Snapshot Space, reduce number of snapshot or write activity.
 - c) Isolation Policy, select "Variable Isolation" to allow components to overlap arrays and access additional available storage.

List of all unmapped and un-snapped volumes within the Storage Domain of Primary Volume, not already in a mirror, whose Capacity is equal or greater than that of the Primary Volume.

List of all Storage Pools within Storage Domain of selected Primary Volume.

New Volume Wizard

Volumes Summary

Delete New Map Snapshot

Configuration Services

Create Volume

Step: Specify volume properties

Enter a name and description for the volume. Pick which storage domain to create it in. Indicate whether you wish to create a mirrored volume.

Name:

Description:

Storage Domain:

Volume Type:

Previous Next Cancel

Configuration Services

Create Volume

Step: Select Storage Pools

Select the number of mirror components to create from each storage pool and specify isolation policy.

Isolation Policy: ☐ Maximum Isolation - All components must reside on separate arrays.
☐ Limited Isolation - Attempt to put all components on separate arrays, but allow overlap if necessary.

Storage Pools:

Name	# Components	Profile	Available
Default	2	Default	60GB
FastStorage	0	myStripe	90GB
OrcleStorage	2	myConcat	50GB

Previous Next Cancel

Configuration Services

Create Volume

Step: Select Storage Pool

Pick which storage pool the volume will be created in. The storage pool's storage profile defines the volume's storage characteristics.

Storage Pools:

Name	Profile	Available	Total
Default	Default	60GB	120GB
FastStorage	myStripe	90GB	200GB
OrcleStorage	myConcat	50GB	150GB

Previous Next Cancel

Configuration Services

Create Volume

Step: Specify mirror volume capacity

Enter the capacity for mirror components.

Capacity of each mirror component: GB

Previous Next Cancel

Configuration Services

Create Volume

Step: Specify volume capacity

Enter the capacity of the volume.

Capacity: GB

☒ Stripe All

Previous Next Cancel

Configuration Services

Create Volume

Step: Allocate Snapshot Reserve Space

A volume may have up to 8 active snapshots. These are stored in a Snapshot Reserve space which may be allocated from any Storage Pool in the same Storage Domain as the volume. Space for more than 8 snapshots may be allocated as a deleted snapshot's space in the reserved area is not available for subsequent use until all older snapshots are also deleted.

Allocate Space For:

Expected Write Activity:

Allocate Reserve from Storage Pool:

Volume / Snapshot Policy:

Associate with Mirror Component:

Previous Next Cancel

Configuration Services

Create Volume

Step: Select unapped initiators

Select unapped initiators that will be mapped to the volume.

Initiators (0 shown)

Initiator Group Name	Storage Domain	Link	Port
initiator1	DEFAULT	1	10
initiator2	DEFAULT	1	10

Previous Next Cancel

Configuration Services

Create Volume

Step 7: Summary

Review and confirm your selections.

Name: myvol
Description: My Mirrored Volume
Storage Pool: n/a

Common GUI Toolkit & UX

Sample App. puts various GUI Components into a an example application.

Virtualization Manager

Used GUI SDK To Create A Real Application

The screenshot displays the EMC Virtualization Manager interface. The top navigation bar includes tabs for System Status, Monitoring, Provision Storage, Mobility Central, and Support. The left sidebar shows a tree view with categories like Hosts, Virtualized Storage, Physical Storage, and Integrated Storage. The main content area is titled 'Hopkinton : Virtual Volumes' and contains a table of virtual volumes.

Name	Capacity	Health	Operational Status	Service Status	Locality
C1_C2_Dev_Mig_Src_0000_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0001_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0002_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0003_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0004_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0005_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0006_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0007_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0008_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0009_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0010_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0011_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0012_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0013_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0014_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0015_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0016_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0017_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0018_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0019_vol	5.62 GB	OK	OK	Unexported	distrib
C1_C2_Dev_Mig_Src_0020_vol	5.62 GB	OK	OK	Unexported	distrib

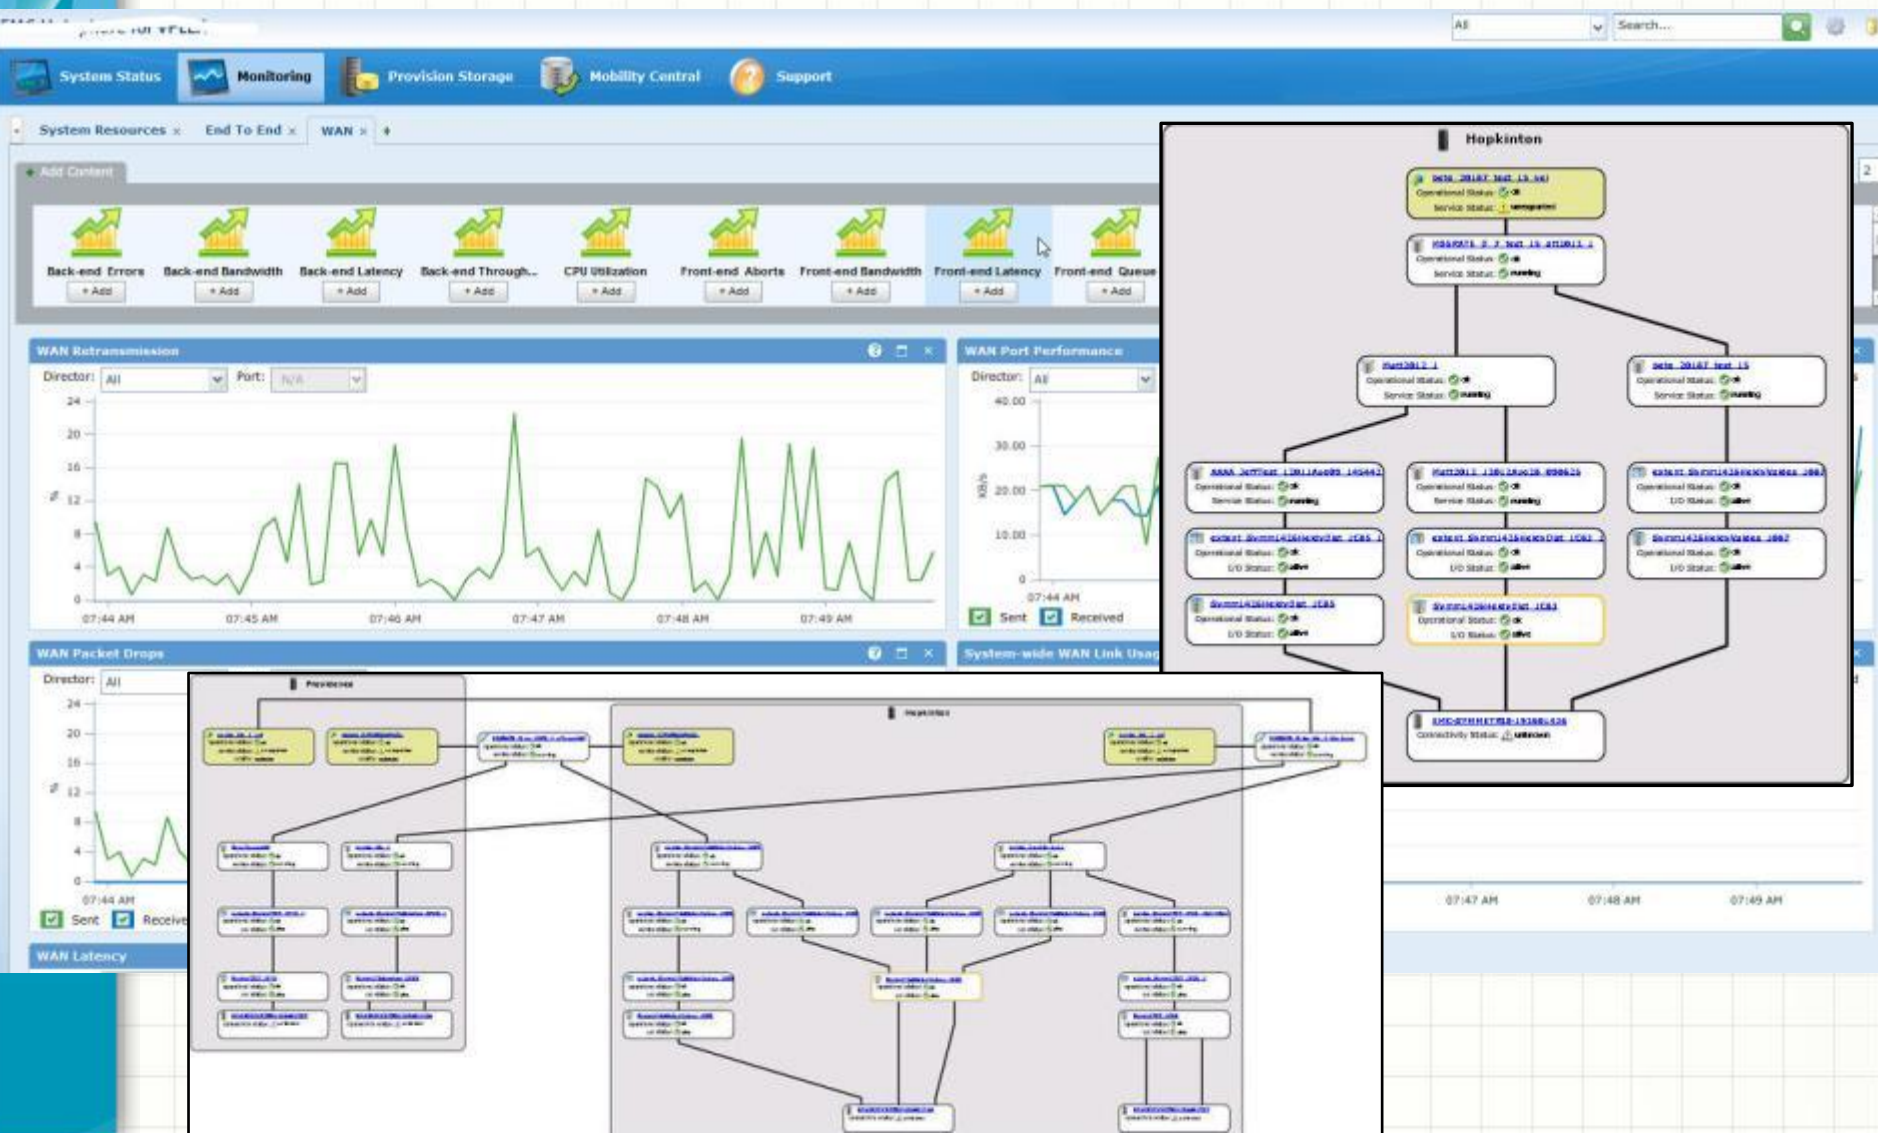

A 'Virtual Volume Properties' dialog is open for 'C1_C2_Dev_Mig_Src_0003_vol'. It shows details such as: Virtual Volume Name, Supporting Device (MIGRATE_BR0_3), Consistency Group (n/a), Locality (distributed), Visibility (global), Expansion Method (storage-volume), Expandable By (0 MB), Expansion Status (-), Block Count (1473600), Block Size (4K), Capacity (5.62 GB), Health (OK), Health Indications (None), Operational Status (OK), Service Status (Unexported), and Recoverpoint Protection At (-).

A 'Map of : C1_C2_Dev_Mig_Src_0003_vol' window is also open, showing a hierarchical diagram of the volume's structure. It includes components like 'MIGRATE_BR0_3', 'C1_C2_Dev_Mig_Src_0003_vol', 'C1_C2_Dev_Mig_Src_0003_extenL', 'C1_vmem_3465_3g_0004', and 'SRC-SYMMETRIX-152883463'.

Virtualization Manager

Again Specialized in Maps and Dashboards

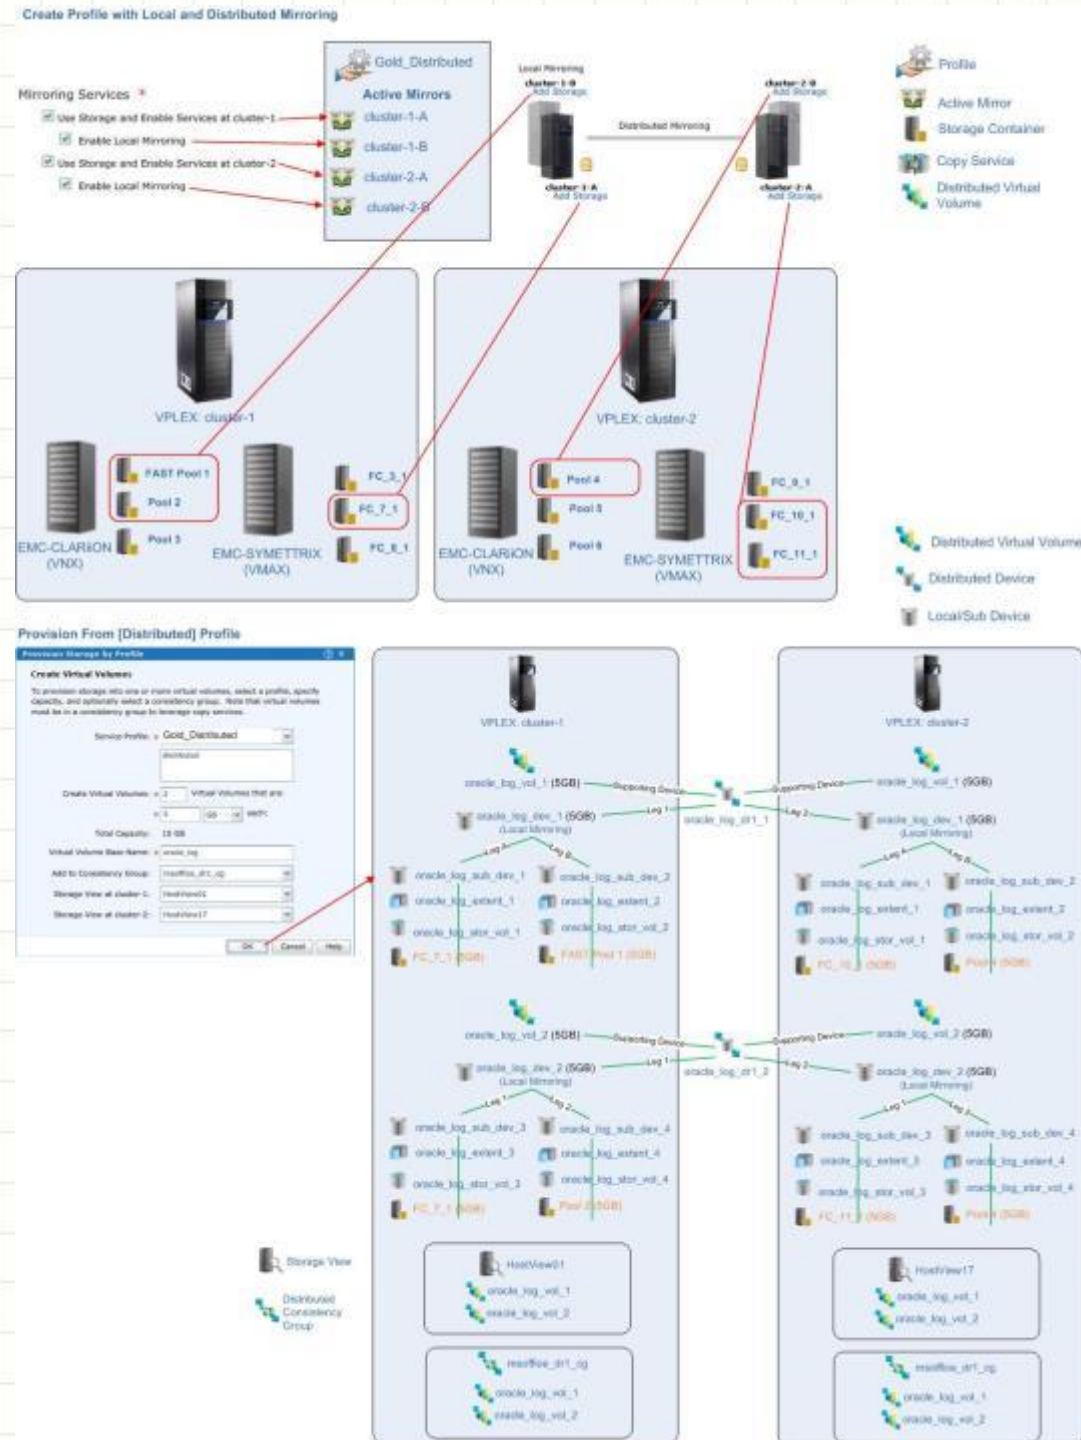

Expert in Complex Mockup Creation

Created Storage GUI's to represent Provisioning, Replication, Snaps & Clones, Migrations, and System Health & Performance

**This diagram shows what backend storage topology is created when various GUI options are selected.*

Mockups (cont.)

Create Consistency Group Mobility Jobs

- Select Mobility Type
- Select Consistency Group
- Create Source-Target Mapping
- Set-up and Start Jobs

[Back](#) [Next](#) [Cancel](#)

The should be true table. The Consistency groups should be available and it should show all its virtual volumes and devices.

Only one selection is allowed. Only one Consistency Group Mobility Job is allowed to be created at a time. This is to simplify the mapping step.

The table should be populated with local Consistency Groups only.

Create Consistency Group Mobility Jobs

- Select Consistency Group
- Select Cache Mode Type
- Create Source-Target Mapping
- Set-up and Start Jobs
- View Results

3 Create Source-Target Mappings

All devices that are in the consistency group must be mapped before the user is allowed to move to the next step. It's all or nothing. Everything gets moved together as one consistency group.

For Local, all the available devices come from the Local Cluster.

For Metro, all the available devices come from the Remote Cluster with synchronous cache mode.

For Geo, all the available devices come from the Remote Cluster but the volumes have to be changed to asynchronous cache mode.

Create Consistency Group Mobility Jobs

- Select Consistency Group
- Select Cache Mode Type
- Create Source-Target Mapping
- Set-up and Start Jobs

Message

Dear Dad,

You were always great with the financial advice so I'm entrusting you with my entire portfolio. Please see that this information gets to the appropriate people.

Love you,

Joe

Hi Mom,

You were great in planning all of the important events of my life -my graduation party, my wedding, now that I've moved on please obey my last requests and follow these wishes on the attached form.

Thanks,

Love Joe

Webelos Advancement Plan

The Webelos Badge is for boys who have completed third grade, or who are ten years old. The Webelos rank is the first step in a boy's transition towards a Boy Scout troop. As he completes the requirements in the Webelos Scout Book, he will work on Activity Badges.

After earning the Webelos badge, the Webelos Scout may receive the Compass Points emblem and gold 'devices' to pin on it as an incentive to complete additional Activity Badges.

Family Website

The screenshot shows the homepage of a family website titled "Our Family". At the top, there is a banner with a collage of family photos and a navigation bar with icons for Members, Email, Photos, Events, and News. Below the banner, the text "Taylor - Krim - Tyler - Plutsky - Haase - Weber" is displayed. The main content area is divided into several sections: "Are You Warped?!?!" featuring a photo of a man, "Family Contact Information" with a dropdown menu, "Family News" with two articles ("Spencer's Arrival" and "Store Your Favorite Websites Online"), and "Holiday Gift Grab" with a photo of two men sitting in chairs. A "Reminder!" box at the bottom lists the next three family events: Dick Tyler's Birthday (4/8/01), Stephen Plutsky's Birthday (5/9/01), and Pam Krim's Birthday (5/24/01).

"Spencer's Arrival"
by Dave & Laura
11/2/01
Spencer David Ross Taylor arrived on 12/15/99. He weighed in at 4lbs, 13oz. Six days later he was up to 9lbs, 6oz. I Laura and I had a great first two weeks with him. Thanks for all of your warm wishes! -Dave

"Store Your Favorite Websites Online"
by Dave Taylor
11/22/00
You may now store links to your favorite websites on our family website. This way you may access your favorite websites from work, home, anywhere! Also, this allows you to share your favorite websites with other family members. To see an example of this, select "Dave & Laura Taylor" from the above drop-down list.

"Welcome To The New Family Website!"
by David Taylor
11/10/00
It's taken a long time to finish, but it was worth it! Click on the buttons above to go to the different areas of the website. To get back to this homepage click on the "Our Family" title. Enjoy! - Dave

Reminder! The next three family events are:

- 4/8/01 Dick Tyler's Birthday
- 5/9/01 Stephen Plutsky's Birthday
- 5/24/01 Pam Krim's Birthday

Holiday Gift Grab

The screenshot shows the "Family Members" page of the "Our Family" website. It features a banner with a collage of family photos and a navigation bar with icons for Members, Email, Photos, and Events. Below the banner, the text "Taylor - Krim - Tyler - Plutsky - Haase - Weber" is displayed. The main content area is divided into two sections: "Family Members" with a dropdown menu and a table of family members, and "Holiday Gift Grab" with a photo of two men sitting in chairs.
